What You Need to Know About the 2020 Census in Arlington County

The 2020 Census directly impacts how much federal funding the Commonwealth of Virginia will receive over the next decade. It is predicted that Virginia will receive $17,776,199,831 from 55 large federal programs for resources such as schools, hospitals, and infrastructure. Failure to obtain a complete and accurate count of state residents could result in Virginia losing millions of federal dollars for programs benefitting Arlington County residents. People of color, low-income populations, young children, immigrants, and undocumented residents are among the groups most likely to be undercounted. Ensuring services for Arlington residents in the future requires that we work together to obtain an accurate Census count.

The 2020 Census will include two phases: self-response and non-response follow-up. Self-response is the most accurate way to complete the count and ensure that Census field representatives do not visit Arlington County households. However, many households are less likely to complete the self-response because of factors such as distrust of government, complex home and living arrangements, and changes in technology that pose challenges for the self-response component. Boosting self-response numbers for the 2020 Census is the most effective way to ensure over $800 billion in federal funding (according to the George Washington University School of Public Policy) is fairly and justly distributed across the entire U.S. population, allowing residents to thrive, live, learn, and grow.

The U.S. Census counts every resident in the United States every ten years. This information is used by the federal government to allocate resources across the country. The Commonwealth of Virginia can receive close to $17,776,199,831 in federal dollars to improve schools, transportation, parks, government assistance programs, emergency assistance, etc. Business also use this information to inform their decisions and bring more growth and commerce.

**how?**

- Educate your staff/volunteers/community members about the Census so they can be a resource for clients/consumers and other community members – Visit [cfnova.org/count-the-region](http://cfnova.org/count-the-region) for local resources.
- Learn more about and support outreach activities and events planned by the [Arlington Complete Count Committee](http://www.countthe-region.org) (a link is available from the above website).
- Engage trusted messengers in activities such as phone banking, public service announcements, social media messaging, and door-to-door canvassing to ensure we get the word out and increase the 2020 Census response rate.
- Strategize ways to provide opportunities in March and April 2020 for trusted community helpers at accessible neighborhood sites to offer internet access and assistance completing the form.

The Census is only 10 or 11 questions. Completing the Census will ensure that Arlington County is eligible for its fair share of federal funding over the next 10 years. Completing the Census will ensure Arlington County receives proper political representation and resources.
Data on Census Tracks and Risk of Undercount in Arlington County

There are neighborhoods in Arlington County facing significant challenges that demand we ensure an accurate census in order to channel needed resources to residents. In 2010, 80.5 percent of households in Arlington County returned their census questionnaires, while the remaining 19.5 percent required in-person follow-up enumeration. The communities predicted to be at greatest risk of an undercount are Aurora Highlands along South Eads (Census tract 1036.02), Fort Myer Heights (tract 1017.01) and Courthouse (tract 1018.02). While Arlington is considered a “high opportunity” community in terms of access to transportation and jobs, the county has a high level of racial and economic segregation. Arlington’s population has increased nearly 14 percent since 2010, and almost 1 percent in the last year alone. Approximately 15 percent of the population is Hispanic or Latinx, the third highest percentage (after Prince William and Loudoun counties) in the Washington metropolitan area. Approximately 5 percent of Arlington’s population resides in hard-to-count neighborhoods. Because the citizenship question jeopardizes response rates, especially among Latinx and Asian communities, it is critical to reach the residents of these hard-to-count areas so they do not lose resources for critical social services. It is critical to identify trusted messengers and conduct extensive outreach within key populations to ensure residents participate in the Census. This will ensure that Arlington County receives the resources it needs to address inequities and improve quality of life.

Frequently Asked Questions

How can I get help completing the Census or accessing the internet?
Once residents receive an invitation to complete the 2020 Census in the mail or online, there will be a number to call for assistance to complete the form.

What about confidentiality?
All Census responses are protected under Title 13 of the U.S. Code. Under this law, the Census Bureau is required to keep respondent information confidential. The Bureau is prohibited from sharing respondents' personal information with immigration enforcement agencies, like ICE, or law enforcement agencies, like the FBI or police. The law also prohibits the use of Census data to determine or deny eligibility for government benefits. The results from any Census or Census-related survey are reported in aggregate statistical format only.

What happens if I don’t complete the 2020 Census?
You will receive several follow-up mailings asking you to complete the Census form. Not completing the Census means Census workers will visit your residence because you are required by law to participate. If you cannot be reached, a Census worker may contact your neighbors for information about your family size.

Will the Census be in my language?
In 2020, the paper form will be available in English and Spanish. People may respond to the Census online and by phone in 13 languages (English, Chinese, Korean, Russian, Spanish, Vietnamese, Arabic, French, Haitian Creole, Japanese, Polish, Portuguese, and Tagalog). The Census Bureau will also have a language guide for 59 languages.
